PRO SERIES - PRO FLOW ARCHITECTURAL

Pro Flow is an innovative new product from The Sarjeant Company that raises the bar for cast-in-place concrete therefore eliminating the need for internal vibration. It's typically a high compressive strength concrete mix.

PIF Uses & Benefits

- Self Consolidating Concrete (SCC)
- Reduced potential for defects due to segregation or bleeding
- Reduced placing time
- Pump with ease & reduce slump loss
- Enhanced permeability when spreading into place which allows good consolidation
- Reduced waiting increases savings in construction cost
- Enhanced encapsulation around heavy congested rebar applications

Applications

- Architectural applications with columns & walls

Pro Series (Pro Flow) is available with the following items

- Coloured concrete
- Fibres (synthetic & steel)
- Plasticizer - mid & high range
- Shrinkage compensating
- Corrosion inhibitor
- High strength Silica Portland blends
- Optional aggregate 10 & 20 mm
