PRO SERIES - WINTER PRO

Your answer to cold weather concrete work (fall, winter & spring)

The Sarjeant Co. Winter Pro is available in a full gamut of mixes

- Is a non-corrosive, non-chloride set accelerating admixture
- Is available with five levels of temperature acceleration (ambient temperature range of +10°C to a low of -7°C)

Winter Pro Uses & Benefits:

- Reduce concrete set times
- Increase early strength for concrete in cold conditions
- Increased concrete protection against freezing
- Enhanced finishing and form removal leads to construction cost savings

Applications:

- Winter Pro does not contain calcium chloride and is non-corrosive to reinforcing steel
- It can also be used in concrete that is to be placed on steel clad or galvanized steel decks

Pro Series Winter Pro is available with the following items

- Coloured concrete
- Fibres (synthetic & steel)
- Plasticizer - mid or high range
- Shrinkage compensating
- Corrosion inhibitor
